

Everything happens for a reason. Let's look at what makes these sectors attractive for investments:

BANKING AND FINANCE

No economy can grow without a strong banking system. Currently, the government and the RBI are cleaning up Indian banks to strengthen them.

PHARMACEUTICAL

Rising income levels, an increasing number of lifestyle diseases, growing health awareness, and greater access to insurance can help the pharmaceutical industry grow.

LOGISTICS

The Goods and Services Tax (GST) has benefited the logistics sector in many ways. The Dedicated Freight Corridor project is also expected to boost the sector.

FAST-MOVING CONSUMER GOODS (FMCG)

Rising income levels and improved standards of living favour the sector. The reduction in the cost of FMCG goods after the implementation of GST is yet another positive factor.
