Are you on track for a large retirement corpus?

A 35-year-old, having a Rs 70,000 monthly expense, will need Rs 8 crore at retirement.

Part 2

How much money should you have when you retire?

In our next edition we will compare various asset classes as per their long term performance.

For detailed table calculation, go to: http://www.beswastantra.com/

YOURS BEHAVIOURALLY

Antidote for Loss-Aversion Bias: Passive Investing?

Loss aversion bias is a problem that most investors face. One of the problems that investors face is that they are more likely to have losses than gains. This is because the perceived losses are more than the perceived gains. This is because of the psychology of loss aversion bias. Loss aversion bias is a problem that most investors face.
