

Swatantra Kumar Explains - Your mother does not need a large amount of money to invest

Mother's don't ask for much. Mutual Funds are the same. You don't need a large sum of money to invest in them. With Mutual Funds' Systematic Investment Plans (SIPs), you can invest with as low as ₹100.

Your mother invests her time and energy in managing the entire house. Now, it's time for her to invest the money that she saves while performing her duties.

Say, she saves ₹500 a month on groceries, travelling, leisure, etc. and invests in MFs.

Monthly Investment	Investment Tenure	Assumed Interest Rate	Investment Value after 15 years
₹500	15 years	8%	₹1.7 lakh*

*Amount not adjusted for inflation and Tax

Thus, your mother can not only easily invest her money but also convert them into lakhs over time. So, this Mother's Day, don't forget to add her SIP to the gift hamper.
